DETAILED ACTION

Interference

1. Claims 1 and 2 are rejected under 35 U.S.C. 135(b) as not being made prior to one year from the date on which U.S. Patent No. 6,435,624 was granted. See *In re McGrew*, 120 F.3d 1236, 1238, 43 USPQ2d 1632,1635 (Fed. Cir. 1997) where the Court held that the application of 35 U.S.C. 135(b) is not limited to *inter partes* interference proceedings, but may be used as a basis for *ex parte* rejections.
2. Claims 1 and 2 of this application is asserted by applicant to correspond to claim(s) of U.S. Patent No. 6,435,624.

The examiner does not consider this claim to be directed to the same invention as that of U.S. Patent No. 6,435,624 because Applicants claim "a brake valve" rather than an "independent brake valve". Independent brake valves are well known in the art and have a specific function. The patentee has modified the control of preexisting standardize brake structure to implement the hybrid control system. Applicant's invention replaces the independent brake valve (as well as other valves) with a brake valve module. While the goals are similar, the methods used to reach them are different. Accordingly, an interference cannot be initiated based upon this claim.

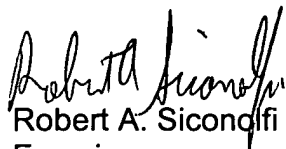

Terminal Disclaimer

3. The terminal disclaimer filed on 8/27/04 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent no 6,334,654 has been reviewed and is accepted. The terminal disclaimer has been recorded.
